

**The Martin family has a disposable income of \$90,000 annually. Assume that their marginal propensity to consume is 0.8 (the Martin family spends 80% of new disposable income on consumption) and that their autonomous consumption spending is equal to \$10,000. What is the amount of the Martin family's annual consumer spending?**

$$90000\$ : 100\% = x\$ : 80\%, \quad x * 100 = 90000 * 80, \quad x = 72000\$$$

The Martin family spends 80% of annual income which is 72000\$ and their autonomous consumption spending is 10000\$.

So Martin's family annual consumer spending is  $72000\$ + 10000\$ = 82000\$$ .

Karen had a roll of ribbon 48 1/2 metres long. How many pieces of ribbon of length 1 1/5m can she cut from the roll? How many metres of ribbon will be left?

The Strategic Arms Limitation Treaty (SALT) agreements signed in the 1970s by the United

States and the Soviet Union were efforts to

- (1) reduce Cold War tensions
- (2) establish a worldwide human rights policy
- (3) increase cooperation in the United Nations
- (4) negotiate a lasting peace in the Middle East

What was the significance of the battle of Gonzales?

In the Russian domain, what non-Christian religion has the greatest number of believers?

At the bank, Brent exchanges \$50 in bills for 50 one-dollar coins. The total mass of the coins is 405 grams. Estimate the mass of 1 one-dollar coin.

Avon, Tupperware, and Southwestern Company of Nashville are among companies in the multibillion-dollar \_\_\_\_\_ industry, which involves selling door-to-door or at home sales parties.

A gas has a pressure of 1.00 atm and a volume of 500 mL. When its pressure is doubled, at constant temperature, to 2.00 atm, its volume halves to 250 mL, following Boyle's Law. However, when its pressure is increased 1000 times, at constant temperature, to 1000 atm, the volume decreases to 2 mL which is more than 1/1000 of 500 mL. What is the reason why Boyle's Law is not obeyed when the pressure is increased to 1000 atm?

What macromolecules are targeted by amylase?

Which of the following is/are transforming food consumption? a. income growth

- b. globalization
- c. climate change
- d. all of the above

People working in a bank must have

How does the pronunciation of a word usually appear in a dictionary? Select all that apply.

- immediately preceding the entry
- usually respelled
- immediately following the entry
- within parentheses
- usually in italics
- with an accent mark

Original Source Material: If learners are new to critique, we see anonymity as a scaffold to generating critical feedback. Learners can practice giving feedback knowing they are not vulnerable to social repercussions. Less than perfect expressions, unwarranted negative reactions, and fruitless ideas are bound to be part of novice feedback, but teachers hope to create learning configurations that support both the giver and the receiver of feedback, especially if the commenters are novice

Student Version:

If providing peer feedback is a skill to be learned then perhaps it is advisable to give learners opportunities to practice giving feedback knowing they are not vulnerable to social repercussions. In this way, anonymity can act "as a scaffold to generating critical feedback" (Howard, Barrett, & Frick, 2010, p. 104).

Which of the following is true for the Student Version above?

- a. Word-for-Word plagiarism
- b. Paraphrasing plagiarism
- c. This is not plagiarism

What is one strategy that Senator's can use to keep a bill from being passed?

What is 75 of 100?

who finna talk?

$-5x=20$  is  $x=-4$ ? i need help and im not sure if thats correct.

Explain why rounding the baby's age to the nearest month is not sensible.

What is the final equation in standard form of  $m=-6/7$ ,  $b=3\ 1/7$

What's the best anime ^\_^
