- b. only if Oceanic did not know about the defect.**
- c. only if Oceanic knew about or could have discovered the defect.**
- d. regardless of what Oceanic knew or could have discovered**

Answer:

D). Regardless of what Oceanic knew or could have discovered

Self-efficacy is \_\_\_\_\_. our level of confidence in our own abilities the belief that we have power over our lives a state of being in which our thoughts about our real and ideal selves are very similar the belief that one's environment can determine behavior

What is the common ratio between successive terms in the sequence

Any abiotic or biotic factor in an ecosystem that causes a population's size to slow or decrease is a \_\_\_\_\_ factor. A) growth

B) limiting

C) carrying

D) density dependent

Billy refuses to drink his orange juice from the 1/2 full glass that his mother gives to him. he wants her to pour the juice into his favorite cup and watches his mother fill it to the brim. billy likes his cup better because he gets more juice in it. with what cognitive concept in piaget's theory is billy having trouble?

Conditions or situations that may prevent a person from making a behavior change are called \_\_\_\_\_.

The first section of the Constitution is called what ?

Which element in the third period would you expect to have the larger atomic radius, sodium (Na) or Sulfur (S)? A. Sodium, because it has a higher effective nuclear charge attracting electrons in fewer energy levels.

B. Sodium, because it has fewer protons attracting electrons in the same energy levels.

C. Sulfur, because it has more protons attracting electrons in more energy levels. D. Sulfur, because it has a higher effective nuclear charge attracting electrons in the same energy levels.

The shift in status of individuals or groups is known as Select one: a. social inequality. b. horizontal transition. c. social differentiation. d. social mobility.

A car travels  $\frac{1}{6}$

of the distance between two cities in  $\frac{3}{5}$

of an hour. At this rate, what fraction of the distance between the two cities can the car travel in 1 hour?

"A survey reported that out of 50 teenagers 9 said they get their news from a newspaper at this rate how many 300 teenagers would get a newspaper"

Suppose that the weekly price of milk is \$3.40 per gallon and MPEP decides to ramp up weekly advertising by 35 percent to \$150 (in hundreds). Use the best-fitting regression model to estimate the weekly quantity of milk consumed after this advertising increase

Jamie's dog had a litter of 6 puppies. All together they weight  $\frac{5}{6}$  kg. If each puppy weighed the same amount how much did one puppy weigh?

In a practical machine, the power output is \_\_\_\_\_ the power input. A. larger than B. multiplied by C. equal to D. smaller than D?

As used in literature, a symbol is — a. the feeling of anticipation a writer creates

b. a group of lines in a poem linked by theme

c. a person, place, or object used to represent an abstract idea

d. the writer's general tone and attitude about life

The doctrine that maintains that the state should not intervene in economics is called

What is the answer to the equation:  $5x+y(x+y)-5$

Sergio made a whole pan of lasagna. His friends ate some of the lasagna. There was  $\frac{1}{3}$  of the pan of lasagna left. Sergio said his friends ate  $\frac{5}{6}$  of the lasagna.

Is Sergio's answer reasonable?

A. No, it is not reasonable because  $\frac{1}{3} \times \frac{5}{6} = \frac{5}{18}$

B. No, it is not reasonable because  $1 - \frac{1}{3} = \frac{2}{3}$

C. Yes, it is reasonable because  $\frac{1}{3} + \frac{1}{2} = \frac{5}{6}$

Poll taxes and grandfather clauses were devices used to

1. [Home](#)

2. [More Solution](#)
