

Suppose that flu shots create a positive externality equal to \$20 per shot. what is the relationship between the market equilibrium output level and the efficient equilibrium output produced?

The flu shots create a positive externality equal to \$20 per shot. The relationship between the market equilibrium output level and the efficient equilibrium output produced is directly proportional. As the equilibrium output increases, the market equilibrium output level also increases.

The number of games in the first round of a chess tournament is equal to $2 \times 2 \times 2 \times 2 \times 2 \times 2$. Write the number of games using an exponent.?

How are socialism and communism similar yet different?

Why did Harry Truman's decision to drop the atomic bomb on the Japanese city of Hiroshima ?

In the following sentence, which word is the adverb?

The cake looked too good to eat.

Which of the following coenzymes participate in the reactions of the pyruvate dehydrogenase complex? A) Thiamine pyrophosphate (TPP)

B) Lipoic acid (lipoamide)

C) Flavin adenine dinucleotide (FAD)

D) Nicotinamide adenine dinucleotide (NAD⁺)

E) Coenzyme A (Co-A)

Between which of the following two nations or territories does Baffin Bay form a natural boundary?

$((10-5) \times 5) - 2 + 9$

order of operations

An 8 - meter- long stick was divided into 13 equal pieces.

What was the length of each piece?

Give me the answer to 588 multiplied by 48

What happened to Charles 1

Ecologists often say that one individual living in a developed country cannot be counted as ecologically equal to one individual from a developing country because:

How does raising the temperature affect the rate of reaction

Madvi was playing a card game with her friends. Each time she played Madvi Lost 13 points. If Madvi played 5 rounds, how many points did she lose overall?

When baby rowan looks in the direction of his mother and focuses on her face, he is activating the _____ lobes?

What adventure does Polydectes suggest that Perseus undertake?

A tent has the shape of a triangular prism. Each end of the tent is a triangle with base length 8 ft and height 5 ft. The tent is 12 ft long from front to back. What is the volume of the tent?

- A. 25 ft³
- B. 240 ft³
- C. 328 ft³
- D. 480 ft³
